What skills and techniques did I learn that will help me become a better educator?

> I learned that form should always follow function with regard to the use of technology in the classroom. Technology, pedagogy, and content should all be tied together. Technology does not need to be super fancy in order to be useful. Just because there is new, shiny technology does not mean it is appropriate for every classroom.

What things am I still uncertain about regarding this topic that I need to investigate further in the future?

- What types of pedagogy are appropriate for particular types of technology and content goals?

How can I <u>apply </u>materials from this session to my own class to enhance the effectiveness of teaching and learning?

> I can effectively use technology by tying it to pedagogy and content. I can also se technology to help get around sticking points in foundational concepts.
